

# TH0520 Precision Current and Voltage Measurement Standard

## 1. Summary

**TH0520** is a Current and Voltage Measuring instrument that directly measures currents up to 2 A or 1 0.5 V voltage, mated to precision I/V, V/V conversion standards, current sensor can be set AC DC high current or high voltage measurement system.

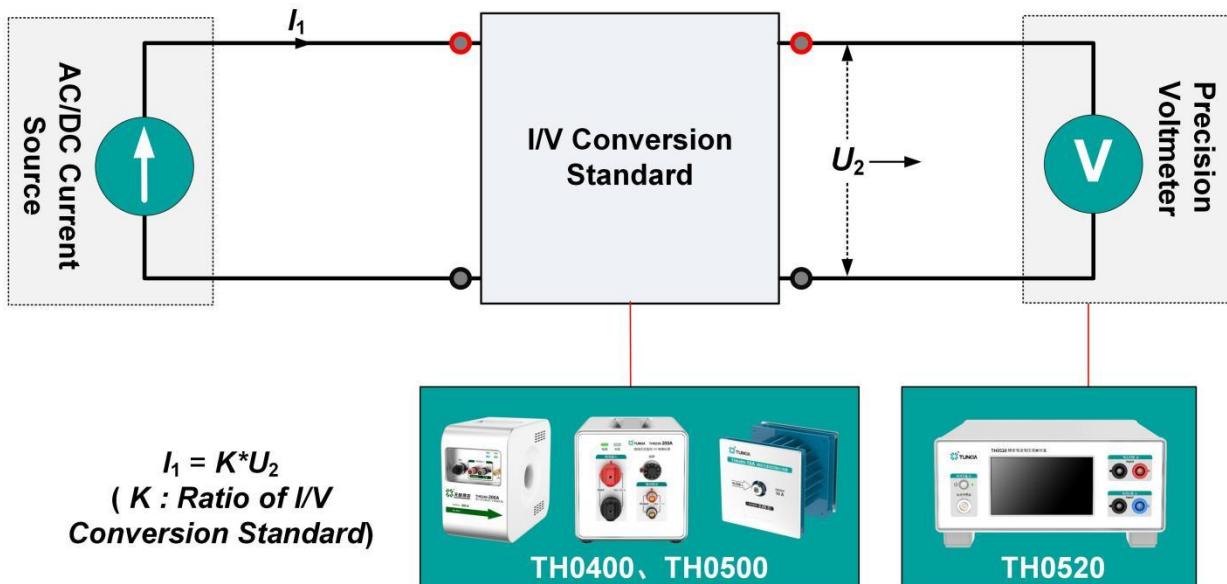

## 2. Features

- Direct current measurement: 10  $\mu$ A~2 A.
- Direct voltage measurement: 10 mV~10.5 V.
- Frequency range: DC, 40 Hz~5 kHz.
- Current measurement uncertainty up to 50 ppm @DC.
- Voltage measurement uncertainty up to 30 ppm @DC.
- Equipped with a dedicated current sensor measurement interface.
- Set the sensor ratio to directly display the primary charge.
- Support DC ripple, 2nd~64th harmonic measurement.
- LCD touch color screen.

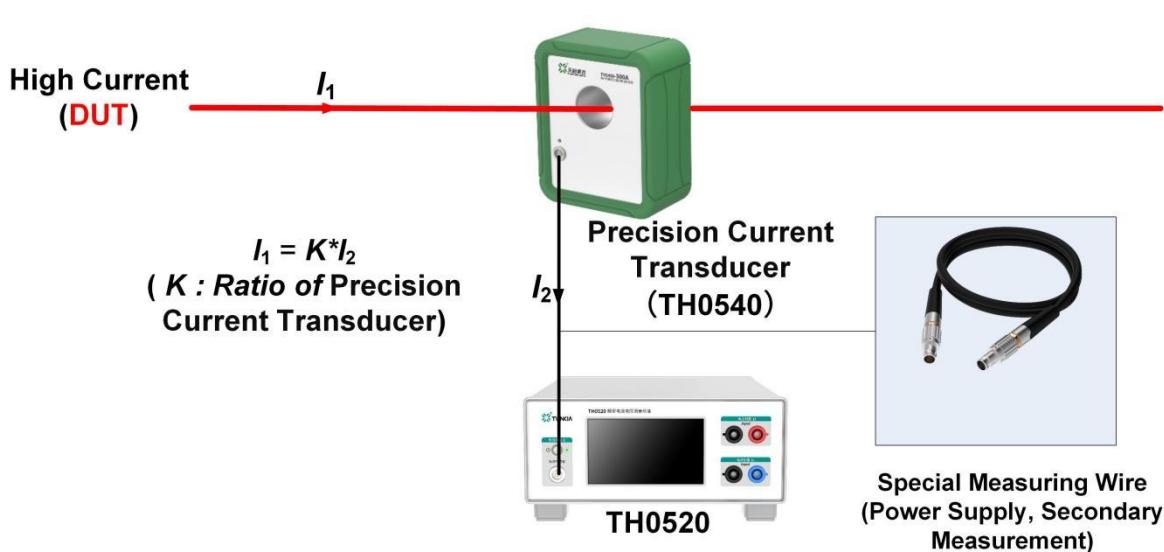

## 3. Applications

- Accurate measurement of AC and DC current and voltage on site
- Calibrate the AC and DC current standard source/meters
- Calibrate AC and DC voltage standard sources/meters

☆ High current conversion measurement

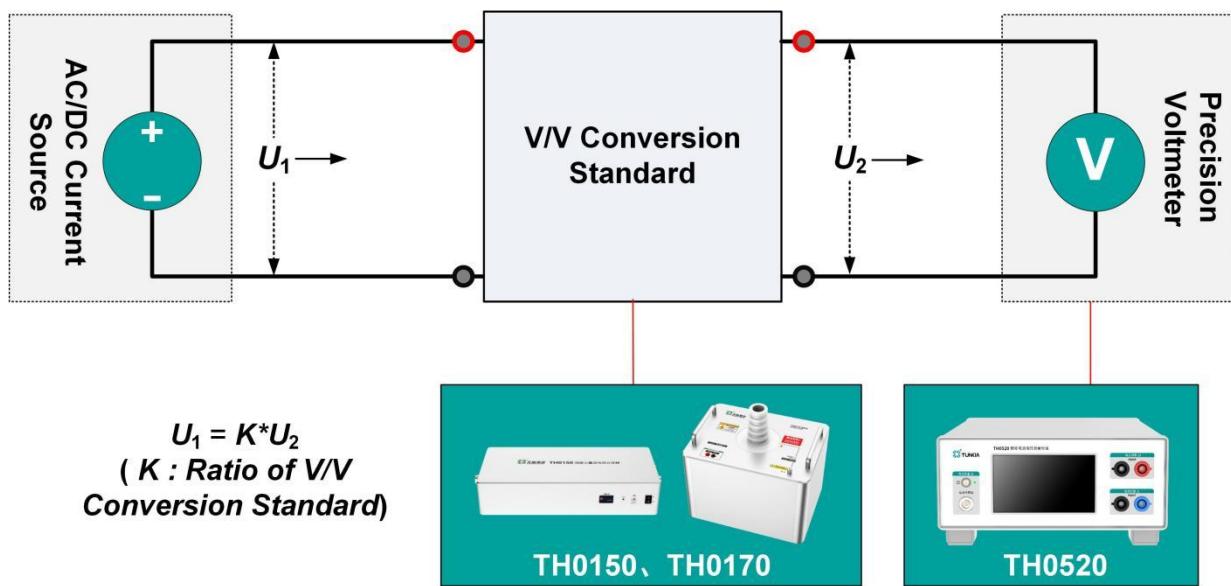

- It can be used with I/V conversion standards such as TH0400 Precision Coaxial Current Shunt and TH0500U Precision Current Transformer to achieve precise measurement of high-current signals.

- It can also be connected to a dedicated current sensor for high-current conversion measurements.

☆ Connect V/V to measure high voltage

- It can be used with precision voltage dividers such as TH 0150 and TH0170 to achieve precise measurement of high-voltage signals.

### 5. General Specifications

Power supply	AC (220±22) V, (50±2) Hz
Maximum power consumption	100 VA
Warm-up time	2 times the warm-up time from the last forecast, up to 30 minutes
Working environment	15°C ~ 35°C, (20%~85%) R·H, no-condensing
Storage environment	0°C ~ 40°C, < 95% R·H, no-condensing
altitude	<3000 m
Communication interface	USB×1、LAN×1、RS232×1
Size	215 mm (W) × 252 mm (D) ×88 mm(H), without feet
Quality	Approx 5 kg
